RECO TRAFFIC VCS - SERIES

Smart and Secure Living for All

RECOTRAFFIC VCS

RecoTraffic C-series

Vision based vehicle classification engine server

RecoTraffic C-series is a line of industrial-grade vehicle classification engine server designed and built with utmost priority on precision and performance.

Key Features

RT - C100S

High performance VCS engine workstation suitable for general application.

RT - C100X

Top-of-the-line industrial-grade VCS engine server for critical application.

RT - C100E

VCS engine in edge-side industrial PC for edge-side application.

Variant

**Powered by Deep Learning Technology**

Automated Classification

Centralized Processing Architecture

X 12 Channel

**Multiple Channel Support**

Camera Brand Agnostic

Use Case

Toll Collection

Automated vehicle classification in toll collection system.

Heavy Vehicle Classification

Automated heavy vehicle detection for road-use violation during peak peak hour

Traffic Enforcement

Automated vehicle classification in speed detection and enforcement system
