

Intelligent Traffic
Detection

RECOTRAFFIC V-SERIES

Smart and Secure Living for All

RECO TRAFFIC VID

RecoTraffic V-series

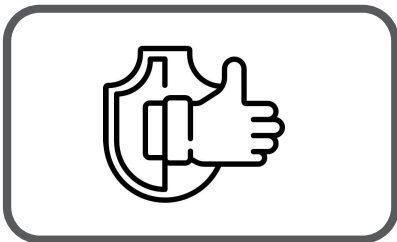

Automated vision-based traffic analyzer

RecoTraffic V-series is designed to provide automated detection on the traffic conditions, incidents, accidents by utilizing camera vision sensor.

Key Features

Reliable Detection

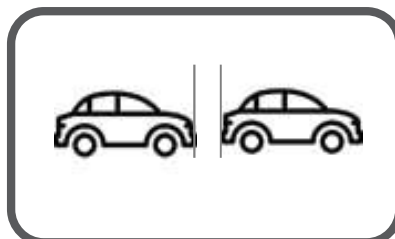

Vehicle Counting

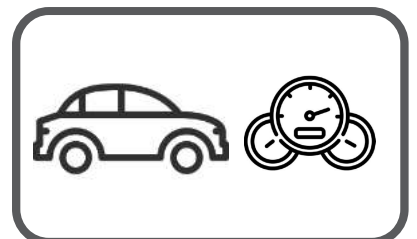

Stopped Vehicle Detection

Real-time Performance

Headway Estimation

Vehicle Average Speed Estimation

Variant

RT - V100S

High performance
VID engine work-
station suitable
for general
application.

RT - V100X

Top-of-the-line
industrial-grade VID
engine server for
critical
application.

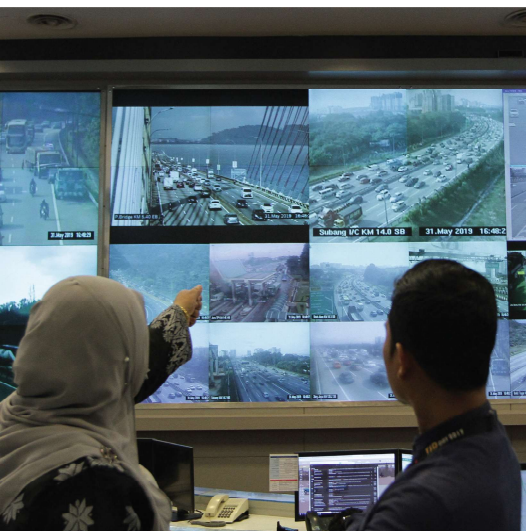

RT - V100E

VID engine in
edge-side industri-
al PC for edge-side
application.

Use Case

Vehicle Congestion

Automated traffic
congestion detection
with VID solutions.

Traffic Monitoring

Real-time traffic data /
incidents

Traffic Control

Integration traffic light
for automated
signaling
