

RecoTraffic MMS

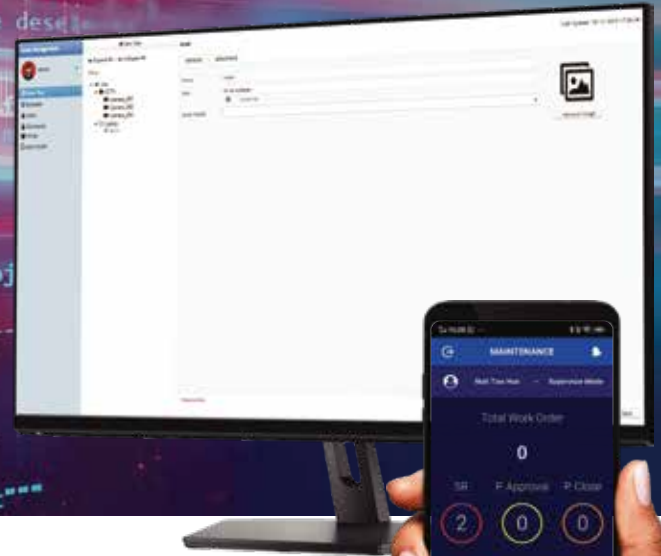

Maintenance Management System

Smart and Secure Living for All

RecoTraffic MMS

RecoTraffic MMS is our centralized cloud-based **Maintenance Management System**. It allows organizations to manage and optimize maintenance activities.

Our system provides tools for tracking, monitoring, maintaining, and analyzing assets, including equipment, vehicles, buildings, and other physical or digital assets.

RecoTraffic MMS is a system that centralizes maintenance information and streamlines maintenance operations. It aids in the optimization of physical assets utilization, performance and availability.

A study conducted by the Aberdeen Group shows that there was a 15% increase in asset utilization and a 20% reduction in maintenance costs with the effective usage of Maintenance Management System - Study by the Aberdeen Group*

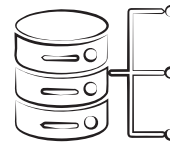

*Asset Management : The Changing Landscape of Predictive Maintenance, March 2014

How will MMS help your organization?

1

Centralized Asset Tracking

Our system allows you to keep track of all your assets in one central location, making it easy to access the information you need.

2

Real-Time Monitoring

The system provides real-time monitoring of your assets, so you can be alerted of any potential issues before they become major problems.

3

Better Cost Control

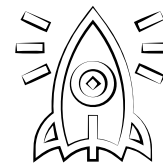

Organizations can identify areas where cost savings can be made, such as reducing the number of underutilized assets, negotiating better prices for replacements or upgrades, and optimizing maintenance schedules.

4

Increased Efficiency

MMS helps you streamline your processes and increase efficiency, allowing you to focus on delivering the best possible service to your customers.

5

Improved Decision-Making

With customizable reports, our system enables organizations to make data-driven decisions about the deployment and allocation of assets.
